

BROOKLYN BRAZILIAN JIU-JITSU TRAVEL TRAINING LOG

We have designed this training routine to keep you mentally and physically connected to your martial arts training with us during a break, vacation or any other time away from class.

They include some of the essential building-blocks of martial arts fitness and function – that way you’ll be able to maintain your skills and improve your comfort with them for when you return.

Each of these routines builds off of techniques taught in our Basic classes, so you can use them even if you haven’t done a lot of classes with us.

Begin slowly and work your way up – the goal is to eventually be able to move through the sets with no rest!

(You can also combine these routines with any other regular fitness work you do – jogging, cycling, weights – and they’ll keep you on track for your return!).
